Important Information

Important Note:

Please make sure your computer hardware and graphics card supports the Nixeus EDG 27" Monitor. Some devices and connections may not be able to support the full 2560 x 1440 resolution at 144Hz refresh rates. Avoid using 3rd party cable adapters/convertors to connect the NX-EDG27 to HDMI, VGA, and DVI output devices - we cannot guarantee they will be compatible with the NX-EDG27. If you are not sure, please contact your computer hardware's manufacturer. Please read this manual before using NX-EDG27 with your computer. It contains important information regarding the use and care of computer monitors.

Safety and Maintenance:

1) Do not expose the monitor to direct sunlight. Keep the monitor away from a stove or any other heat source.

2) Remove or secure any objects that may fall into the monitor's vents. Do not obstruct or block the cooling vents of the monitor.

3) Don't jam the vents on the enclosure.

4) When setting up the monitor for use, please ensure the power plug and socket are easy to insert and extract.

5) When disconnecting the power cord or DC power line for the monitor, please wait for 6 seconds before reconnecting the power cord or DC power line wires for normal operation.

6) Please use only approved power line and power adapters provided by Nixeus. If any power connections are missing, please contact Nixeus for a replacement. Using un-authorized power connectors may damage your monitor and void your warranty.

7) During operation, please do not throw objects and take care to avoid collision with the monitor. Do not over clock or modify the monitor's decoder board. Please do not apply excessive force to the LCD panel or drop the monitor. Warranty does not cover physical damages, over-clocking, and modifications to the monitor.

8) When monitor is not in use for a long period of time, please disconnect the power plug.

9) When using slightly wet cloth or LCD cleaners to clean the monitor, please disconnect the power adapter. Do not use organic solvent, alcohol, house hold glass cleaners or ammonia liquid to clean the monitor - these may damage the display panel.

10) Do not store or use monitor in hot, direct sunlight, or in a cold environment. To avoid electrical shock and to prevent monitor damage; do not use the monitor in dusty, rain, wet, and humid conditions. If monitor gets wet, please wipe clean with soft dry cloth as soon as possible. If foreign objects or liquids get into the monitor, please disconnect power adapter immediately. For service please contact Nixeus Technical support for service and repair at techsupport@nixeus.com

11) To ensure long life and best performance of the monitor, please use the monitor in these safe and optimum conditions: Temperature = 0-40 degrees Celsius ($32^{\circ}-95^{\circ}$ Fahrenheit), Humidity = 20-80% RH

Avoiding Image Persistence, Incidental Image or After Image:

1) When the monitor is on and unattended, please use a moving screen saver. If there is a static (non moving image) on the screen, please refresh regularly or start an application to start using the screen.

2) Long time continuous display of static images may case a "brand" on the screen; this is also cal "image persistence" or "incidental image" or "after image." "Brand," "incidental image" or "after image" is a common phenomenon of LCD Panel Technology. In most cases, after turning off the power supply for a certain amount of time the "brand," "incidental image" or "after image" or "after image" will gradually disappear. Also by displaying a pure white image for the entire screen for the same duration that you had the static image that caused the image persistence may remove the image persistence. Please contact Nixeus if you need assistance in removing image persistence.

CAUTION: Serious "brand," "incidental image" or "after image" will not disappear and cannot be repaired. This type of damage is not covered by warranty. Please take good care of your monitor to prevent serious "brand," "incidental image" or "after image."

Larger display panels may have some glow around the edges or corners. This is known as back light bleed and Glow - this is normal due to the display LED technology that allows more light and higher brightness to produce more vibrant colors and brighter pictures.

If your monitor needs replacement parts, warranty service, and repairs please do not attempt to do it yourself! Doing so may void the warranty. Please contact techsupport@nixeus.com for warranty support. For more Information, please visit www.nixeus.com

CAUTION: DO NOT PRESS THE RAISED CIRCULAR SECTION AT THE BOTTOM RIGHT CORNER OF THE BEZEL. It is not a button and it does not have any function.

Getting Started

NX-EDG27

NX-EDG27S

Box Contents: for NX-EDG27 (With Height Adjustable, Pivot, Tilt, and Swivel Stand)

- Nixeus EDG 27" IPS 2560x1440 AMD FreeSync 144Hz Gaming Monitor (NX-EDG27)
- Stand Base x 1 (with 4 screws)
- Stand Shaft x 1 (with 4 screws) preinstalled.
- DisplayPort to DisplayPort Cable x 1
- Power Adapter & Power Cable x 1
- NX-EDG27 Quick Start Guide
- 3.5mm AUX Audio Cable

Installing Base Stand: (Tools needed – Philips Screw Driver)

Please refer to quick start guide for installation of Stand Base and Stand Shaft.

Box Contents: for NX-EDG27S (With Base Tilt Only Stand)

- Nixeus EDG 27" IPS 2560x1440 AMD FreeSync 144Hz Gaming Monitor (NX-EDG27S)
- Stand Base x 1 (with 1 screw)
- Stand Shaft x 1 (with 4 screws) preinstalled.
- DisplayPort to DisplayPort Cable x 1
- Power Adapter & Power Cable x 1
- NX-EDG27 Quick Start Guide
- 3.5mm AUX Audio Cable

Installing Base Stand: (Tools needed – Philips Screw Driver)

Please refer to quick start guide for installation of Stand Base and Stand Shaft.

NOTE: Both the NX-EDG27 and NX-EDG27S stands are removable to allow for 100% compatibility with 3rd Party Custom VESA Display Mounting Solutions.

Input and Connection Ports

DC-IN: External power connector for Power Adapter

DVI: Dual Link DVI

HDMI 2: HDMI 1.4

HDMI 1: HDMI 2.0 (Supports 2560x1440 Resolution with Refresh Rates up to 144Hz with HDMI 2.0 compliant output device and cable)

DP: DisplayPort 1.2a (Supports 2560x1440 Resolution with Refresh Rates up to 144Hz and with AMD FreeSync)

Green Audio Input Port: For connecting the audio cable from the audio output of your computer (when using DVI video connection), gaming console, or other audio output source device.

Blue Audio Output Port: For connecting your headphones, desktop speakers, sound bar, or any other audio speaker device.

The included DisplayPort to DisplayPort cable is for connecting the NX-EDG27 for DisplayPort output devices/hardware.

NOTE: Do not use cable/adpater converters to connect the NX-EDG27 to HDMI, DVI, or VGA output hardware/devices. We cannot guarantee these adapters will work with the NX-EDG27. To enable AMD FreeSyncTM Technology - a direct DisplayPort only cable connection to your computer is required.

NX-EDG27 Power Cable and Power Supply:

Only use the power cable included with the NX-EDG27. Using any other un-authorized power adapters may damage your monitor and void your warranty. Connect the power cable to internal power supply on the back of the monitor.

Monitor and Stand Adjustment

Monitor Tilting Forward/Back (NX-EDG27 and NX-EDG27S):

Make sure the NX-EDG27 is on a stable level surface. Use both hands, hold the top and bottom of the frame to tilt the monitor forward or backward by up to 15° .

Monitor Swivel Left/Right (NX-EDG27):

Make sure the NX-EDG27 is on a stable level surface. Holding the base shaft with your hand, carefully twist the monitor shaft left or right to desired orientation.

Monitor Height Adjustment (NX-EDG27):

Use both hands, press down the locking button, the slide the monitor up and down the stand shaft for your desired height by up to 4 inches. Release button to lock in the desired height.

Monitor Pivot to 90° Portrait Mode (NX-EDG27): Make sure the NX-EDG27 is on a stable level surface. Using both hands, first raise the monitor to the highest point. Next pivot the monitor clock wise into portrait mode.

<u>Monitor Button Operations - Legends and Functions</u> AUTO MENU VOL+ VOL- UP DOWN ()

Button Functions when NOT navigating in the On Screen Display (OSD) Main Menu

- "AUTO" Press to AUTO detect video inputs. Also brings up the video INPUT menu for DP, HDMI 2.0, HDMI 1.4 and DVI for switching to different video source.
- "MENU" Brings up and enables the On Screen Display Menu (OSD).
- "VOL+" Increase display's speaker volume. Press to navigate forward or go to next (to the right).
- "VOL-" Decrease display's speaker volume. Press to navigate back or go to previous (to the left).
- "UP" Increase display brightness.
- "**DOWN''** Decrease display brightness.
- [^し] POWER ON/OFF

Video Source Input Selection

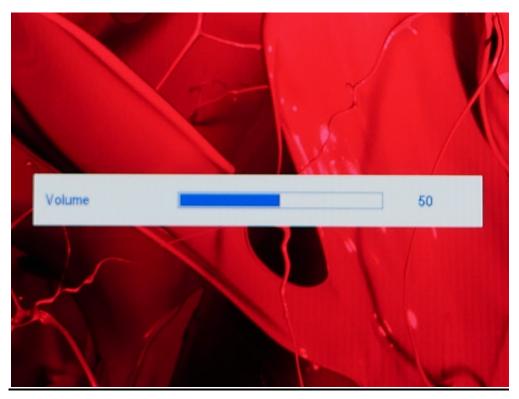

The NX-EDG27 supports multiple video source devices with DisplayPort 1.2, HDMI 2.0, HDMI 1.4, and Dual Link DVI connections.

a) To bring up the INPUT sub menu, press "AUTO."

b) Press "**VOL+**" to move right or press "**VOL-**" to move left to select the input for your current video output source and press "**MENU**" to confirm.

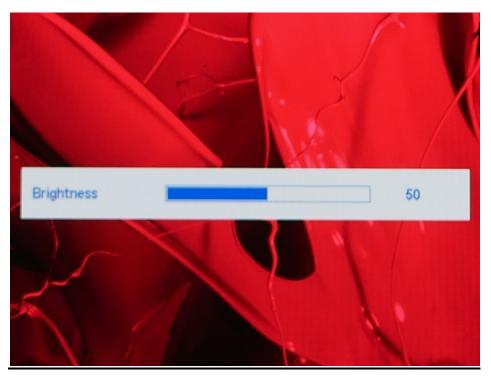

VOLUME

The NX-EDG27 includes two built in stereo speakers.

A) To adjust the volume press "VOL+" to move right or press "VOL-" to move left to select the desired volume.

Brightness

A) To adjust the BRIGHTNESS press "UP" to move right or press "DOWN" to move left to select the desired BRIGHTNESS for the display.

	Ļ	-⊡ <	>	DP 2560×1440@144.0Hz			- - - -	>	DP 2560×1440@144.0Hz

The SHARPNESS feature allows you to set your preferred sharpness for your text, video, and picture content.

a) In the PICTURE sub-menu, use the arrow buttons "**DOWN**" or "**UP**" to highlight SHARPNESS and press "**MENU**" to confirm selection.

b) Press "**VOL** -" to make the SHARPNESS lower or press "**VOL**+" to make the SHARPNESS higher. Default SHARPNESS is at 2.

c) Once you adjust the SHARPNESS settings to your desired level, press "MENU" once to confirm and press "AUTO" exit to the PICTURE sub-menu.

PICTURE (Sub-Menu) - ASPECT RATIO

Picture	Color	Advance	() OSC	•	Information	Picture	Color	Advanc		OSD	Information
	Brightness Contrast Sharpness Aspect Ratio	-	Full	50 50 2			Brightness Contrast Sharpness Aspect Ratio Ultra Vivid		4:3 Off	50 50 2	
	Ultra Vivid DCR		Off				DCR		Off		
		- 	>	,	DP 2560×1440@ 144.0Hz		Ļ		>		DP 2560×1440@144.0Hz

The ASPECT RATIO feature allows you to set your preferred ASPECT RATIO for your monitor's video, and picture content. Available ASPECT RATIO settings are FULL (16:9), 4:3, and 1:1

a) In the PICTURE sub-menu, use the arrow buttons "**DOWN**" or "**UP**" to highlight ASPECT RATIO and press "**MENU**" to confirm selection.

b) Press "**VOL** -" to make the SHARPNESS lower or press "**VOL**+" to change the ASPECT RATIO. Default ASPECT RATIO is at FULL and is the recommended setting.

c) Once you adjust the ASPECT RATIO settings to your desired level, press "**MENU**" once to confirm and press "**AUTO**" exit to the PICTURE sub-menu.

PICTURE (Sub-Menu) - ULTRA VIVID

Picture	Color	Advanc		SD	Information	Picture	Color	Advance	OSD)	Information
			•								
	Brightness	_	_	50			Brightness	_	-	50	
	Contrast			50			Contrast			50	
	Sharpness			2			Sharpness			2	
	Aspect Ratio	•	Full				Aspect Ratio	•	Full	•	
	Ultra Vivid	•	Off	•			Ultra Vivid	•	High	•	
	DCR	•	Off				DCR	•	Off		
					DP 2550×1440@144.0Hz						DP 2550×1440@144.0Hz
	4	-D <	>		2000/1440@144.0HZ		4	Ð <	>		2000/1440@144.002

The ULTRA VIVID feature allows you to set your preferred settings for more vivid or vibrant colors for your text, video, and picture content. Available settings is OFF, LOW, MEDIUM, and HIGH. Enabling this feature may affect the accuracy of picture color, affect picture/video quality, or add input lag in PC games (we recommend leaving this feature off for PC Gaming).

a) In the PICTURE sub-menu, use the arrow buttons "**DOWN**" or "**UP**" to highlight ULTRA VIVID and press "**MENU**" to confirm selection.

b) Press "VOL -" or press "VOL+" to adjust the ULTRA VIVID settings. Default ULTRA VIVID is OFF.

c) Once you adjust the ULTRA VIVID settings to your desired level, press "**MENU**" once to confirm and press "**AUTO**" exit to the PICTURE sub-menu.

PICTURE (Sub-Menu) - DYNAMIC CONTRAST RATIO (DCR)

Picture	Color	Advance	(Contraction of the second se	Information	Picture	Color	Advance	OSD	Information
	Brightness Contrast Sharpness Aspect Ratio Ultra Vivid DCR	۹ ۵	50 51 2 2 11 11 15 15 15 15 15 15 15 15 15 15 15	0		Brightness Contrast Sharpness Aspect Ratio Ultra Vivid DCR		Off	50 50 2
	Ļ	£⊒ <	>	DP 2560×1440@144.0Hz		Ļ	च <	>	DP 2560×1440@144.0Hz

The DCR (DYNAMIC CONTRAST RATIO) feature allows you to see more of a dark image or dark scene by increasing the contrast ratio dynamically. Enabling this feature may affect the accuracy of picture color, affect picture/video quality, or add input lag in PC games (we recommend leaving this feature off for PC Gaming).

a) In the PICTURE sub-menu, use the arrow buttons "**DOWN**" or "**UP**" to highlight DCR and press "**MENU**" to confirm selection.

b) Press "VOL -" or press "VOL+" to make the DCR ON or OFF. Default DCR is at OFF.

c) Once you adjust the DCR to your desired settings, press "MENU" once to confirm and press "AUTO" exit to the PICTURE sub-menu.

On Screen Display (OSD) COLOR SUB-MENU

NOTE: Only Custom Calibrate the Monitor's COLOR SETTINGS if you have a Colorimeter.

Picture	Color	Advance	() () () () () () () () () () () () () (Information	Picture	Cotor	Adva	e 🔍	OSD	Information

	÷	Ð	< >		DP 2560×1440@144.0Hz			Ð	< >		DP 2560×1440@144.0Hz

The NX-EDG27 has SATURATION settings to allow you to adjust color saturations for your professional use, general use and gaming needs.

a) In the COLOR sub-menu, use the arrow buttons "**DOWN**" or "**UP**" to highlight SATURATION and press "**MENU**" to confirm selection.

b) Press "**VOL** -" to make the SATURATION lower or press "**VOL**+" to make the SATURATION higher. Default SATURATION is at 50.

c) Once you adjust the SATURATION settings to your desired level, press "**MENU**" once to confirm and press "**AUTO**" exit to the COLOR sub-menu.

NOTE: Only Custom Calibrate the Monitor's SATURATION SETTINGS if you have a Colorimeter.

COLOR TEMPERATURE (Sub-Menu) - GAMMA

NOTE: Only Custom Calibrate the Monitor's GAMMA and COLOR TEMPERATURE if you have a Colorimeter.

Picture	Color	Advant		DSD	Information	Picture	Color	Advar		OSD	Information
	Color Effect		Standard				Color Effect	•	Standard	+	
	Saturation	-		50			Saturation			50	
	Gamma	•	Off	•			Gamma	•	Off	•	
	Temperature	•	6500	•			Temperature	•	6500	•

	4	-E - (< >		DP 2560×1440@144.0Hz		÷	Ð	< >		DP 2560×1440@144.0Hz

The NX-EDG27 has five preset GAMMA for your professional use, general use and gaming needs - OFF, 1.8, 2.0, 2.2 and 2.4.

a) In the COLOR sub-menu, use the arrow buttons "**DOWN**" or "**UP**" to highlight COLOR EFFECTS and press "**MENU**" to confirm selection.

b) Press "**VOL** -" to make the COLOR EFFECTS lower or press "**VOL**+" to make the COLOR EFFECTS higher. Default COLOR EFFECTS is at 2.

c) Once you adjust the COLOR EFFECTS settings to your desired level, press "**MENU**" once to confirm and press "**AUTO**" exit to the COLOR sub-menu.

NOTE: Only Custom Calibrate the Monitor's GAMMA and COLOR TEMPERATURE if you have a Colorimeter.

COLOR (Sub-Menu) – TEMPERATURE

Picture	Color	Advance	e OSD		Information	Picture	Color	¢. Adva		DSD	Information
	Color Effect Saturation Gamma Temperature	•	Standard Off 6500	50			Color Effect Saturation Gamma		Standard Off	50	
	R G B			129 123 128			Temperature R G B		5400	122 117 112	
	÷	-E <	<		DP 2560×1440@144.0Hz		<u>ب</u>	Ð	< >		DP 2560×1440@144.0Hz

The NX-EDG27 has a premium feature to allow you to custom calibrate the color temperature and color settings for RED, GREEN, and BLUE without the assistance or need of your computer's operating system or graphics card color temperature calibration features. This feature allows you to create more accurate colors for content creation, print work, photography and graphic design. We recommend only to use this feature with colorimeter hardware. To enable this feature and make it active for the video/picture of the monitor, you have to enable and activate USER in the TEMPERATURE category of the COLOR Sub-Menu.

a) In the COLOR sub-menu, use the arrow buttons "**DOWN**" or "**UP**" to navigate to TEMPERATURE and press "**MENU**" to enable TEMPERATURE selection.

b) Use "VOL -" or "VOL+" to cycle through the settings and to highlight USER.

c) Press "MENU" once to confirm the USER selection and exit to the COLOR sub-menu. The RED, GREEN, and BLUE are now selectable for custom configuration.

NOTE: TEMPERATURE default settings is 6500K. Other TEMPERATURE settings of 5400K, SRGB, USER, and 9300K. The TEMPERATURE setting must be set to USER. USER needs to always be highlighted and selected in TEMPERATURE settings if you need to custom calibrate colors for professional work. If USER is not selected - the RED, GREEN, and BLUE will be grayed out and not selectable for configuration. Also if USER is not selected or active - the custom settings will not be represented on the monitor and picture/video.

NOTE: Only Custom Calibrate the Monitor's GAMMA and COLOR TEMPERATURE if you have a Colorimeter.

TEMPERATURE - USER (Custom Color Temperature Adjustments)

Picture	Color		so:	OSD	Information	Picture	Color	Adv	ance	OSD	Information

c) Once you set your desired BLUE temperature settings, press "MENU" to confirm selection and press "AUTO" exit to COLOR sub-menu to adjust the next color settings or to exit out of the COLOR sub-menu.

d) Once you are finished adjust and calibrating the all the R,G,B color settings - Press "AUTO" once to exit to the COLOR sub-menu. To completely exit out of the On Screen Display press "AUTO" again.

NOTE: When using a colorimeter to calibrate the monitor, you may need to exit and enter each RGB (Red, Green, Blue) color multiple times to adjust the color temperature settings to reach the desired results. Your computer's color output may have slight variations of color reproduction and image quality depends on graphics card used and video output port used. We recommend using a DisplayPort connection for the best and most consistent color performance.

NOTE: Only Custom Calibrate the Monitor's GAMMA and COLOR TEMPERATURE if you have a Colorimeter.

ADVANCE (OSD) - SETTINGS

VOLUME

a) In the ADVANCE sub-menu, use the buttons "**DOWN**" or "**UP**" to highlight VOLUME and press "**MENU**" to confirm selection.

b) Press "**VOL** -" to make the VOLUME lower or press "**VOL**+" to make the VOLUME higher (Default VOLUME is at 50).

c) Once you adjust the VOLUME settings to your desired level, press "**MENU**" once to confirm and press "**AUTO**" to exit to the ADVANCE sub-menu.

AUDIO SOURCE

Picture	Color	Adva		OSD	Information	Picture	Color	Adv	ance	OSD OSD	Information
	Volume Audio Source DP Option	•	DP DP 1.2	50	-		Volume Audio Source DP Option	•	Line in DP 1.2	50	
	Over Drive Low Blue Ray	•	Medium Off	*			Over Drive Low Blue Ray	•	Medium Off	*	
	ų	Ð	< >		DP 2560×1440@144.0Hz		<u>ب</u>	Ð	< >		DP 2560×1440@144.0Hz

The AUDIO SOURCE settings gives you the option to select which connection source to transmit audio to the NX-EDG27 internal speakers. By default, the AUDIO SOURCE will be set the cable connection transmitting Video or picture. Only DisplayPort and HDMI can transmit video and audio to the NX-EDG27. The NX-EDG27 also includes a 3.5mm audio cable for an "Line In" alternative audio source transmission - mainly for the DVI connection since DVI cannot transmit audio.

a) In the ADVANCE sub-menu, use the buttons "**DOWN**" or "**UP**" to highlight AUDIO SOURCE and press "**MENU**" to confirm selection.

b) Press "**VOL** -" or "**VOL**+" change the AUDIO SOURCE (if you are planning to use "Line In" with 3.5mm audio cable). Default AUDIO SOURCE may be DP or HDMI.

c) Once you selected your AUDIO SOURCE, press "MENU" once to confirm and press "AUTO" to exit to the ADVANCE sub-menu.

DP OPTION – DISPLAYPORT OPTION

Picture	Color	Adv	ince	OSD	Information	Picture	Color	Adv	ince	050	Information
	Mahara										
	Volume Audio Source	-	DP	50			Volume Audio Source		DP	50	
	DP Option	•	DP 1.2	•			DP Option	•	DP 1.1	•	
	Over Drive	•	Medium	*			Over Drive	•	Medium	•	
	Low Blue Ray	•	Off	•			Low Blue Ray	•	Off	•	
	<u>ب</u>	Ð	< >		DP 2560×1440@144.0Hz		÷	Ð	< >		DP 2560×1440@99.9Hz

The NX-EDG27 two DP OPTION (DisplayPort Options) for your DisplayPort cable and DisplayPort source version type. The default setting is DP 1.2, which is required for the NX-EDG27 to have a resolution of 2560x1440, AMD FreeSync and 144Hz refresh rate. The alternative setting of DP 1.1 can only support 2560x1440 resolution with 60Hz refresh rate.

a) In the ADVANCE sub-menu, use the buttons "**DOWN**" or "**UP**" to highlight DP OPTION and press "**MENU**" to confirm selection.

b) Press "**VOL** -" or "**VOL**+" change the DP OPTION. The default setting is DP 1.2 and is the recommended settings.

c) Once you selected your DP OPTION settings, press "MENU" once to confirm and press "AUTO" to exit to the ADVANCE sub-menu.

OVER DRIVE – ANTI-GHOSTING

Picture	Color		🏟 🔪	OSD	Information	Picture	Color	¢, Adva		OSD	Information
	Volume Audio Source DP Option Over Drive	•	DP DP 12 Medium	50 • •			Volume Audio Source DP Option Over Drive	•	DP DP 1.2 High	50	
	Low Blue Ray	•	< >	•	DP 2560×1440@144.0Hz		Low Blue Ray	÷	off	•	DP 2560×1440@144.0Hz

The NX-EDG27 has three OVER DRIVE settings of LOW, MEDIUM, and HIGH to help minimize ghosting in PC Games. The recommended setting is LOW due to MEDIUM or HIGH may be too strong for some games.

a) In the ADVANCE sub-menu, use the buttons "**DOWN**" or "**UP**" to highlight OVER DRIVE and press "**MENU**" to confirm selection.

b) Press "**VOL** -" or press "**VOL**+" to cycle through the OVER DRIVE settings. Default OVER DRIVE settings is OFF.

c) Once you adjust the OVER DRIVE settings to your desired level, press "MENU" once to confirm and press "AUTO" exit to the ADVANCE sub-menu.

NOTE: OVER DRIVE performance and results may vary depending on the computer game or application. Recommended OVER DRIVE setting is LOW. When using AMD FreeSync Technology, Anti-Ghosting may automatically apply even when OVER DRIVE is set to OFF.

LOW BLUE RAY – LOW BLUE LIGHT DISPLAY FEATURE

Picture	Color	Adva		OSD	Information	Picture	Color	Adv	since	OSD	Information
	Volume			50			Volume			50	
	Audio Source	•	DP	•			Audio Source	•	DP	•	
	DP Option	•	DP 1.2	•			DP Option	•	DP 1.2	•	
	Over Drive	•	Medium	•			Over Drive	•	Medium	•

					DP						DP
	÷	Ð	$\langle \rangle$		2560×1440@144.0Hz		→	Ð	< >		2560x1440@144.0Hz

The NX-EDG27 has three LOW BLUE RAY settings of LOW, MEDIUM, and HIGH to help minimize blue light transmission from the monitor to help prevent eye strain or eye damage due to prolong use. Lowering the blue light transmission will affect the accuracy of color for professional or gaming use of the display.

a) In the PICTURE sub-menu, use the arrow buttons "**DOWN**" or "**UP**" to highlight LOW BLUE RAY and press "**MENU**" to confirm selection.

b) Press "VOL -" or press "VOL+" to adjust the settings either . The default LOW BLUE RAY setting is OFF.

c) Once you adjust the LOW BLUE RAY settings to your desired level, press "**MENU**" once to confirm and press "**AUTO**" exit to the PICTURE sub-menu.

OSD SETTINGS (Sub-Menu) - LANGUAGE

The NX-EDG27 supports multiple languages for its On Screen Display (OSD) Menu.

a) To bring up the OSD Main Menu, press "**MENU**". Next use the arrow buttons "**VOL** -" or press "**VOL**+" to navigate to the OSD SETTINGS sub-menu and press "**MENU**" to confirm selection.

a) Use the arrow buttons "**DOWN**" or "**UP**" to navigate to LANGUAGE. Make sure selection is highlighted (see picture) and press "**MENU**" to confirm selection.

b) Use the arrow buttons "**VOL** -" or press "**VOL+**" to navigate to the preferred "LANGUAGE." Make sure selection is highlighted (see picture) and press "**MENU**" to confirm selection. ENGLISH is the default LANGUAGE. Available LANGUAGES include French, Italian, Spanish, Dutch, and Portuguese.

c) Press "AUTO" once to confirm preferred settings and exit to the SETUP sub-menu to begin the next adjustment or to completely exit out of the On Screen Display by pressing "AUTO" again.

OSD SETTINGS (Sub-Menu) - MENU TIME

Picture	Color	Advan		OSD	Information	Picture	Color	Advant			Information
									•		
	6inguage		English				2inguage		English	•	
	Menu Time			60			Menu Time			20	
	OSD H Position	-		100			OSD H Position			100

The OSD ROTATE feature allows you to rotate the orientation of the OSD Menu on the screen.

a) To bring up the OSD Main Menu, press "**MENU**". Next use the arrow buttons "**VOL** -" or press "**VOL**+" to navigate to the OSD SETTINGS sub-menu and press "**MENU**" to confirm selection.

b) Use the arrow buttons "**DOWN**" or "**UP**" to navigate to OSD ROTATE. Make sure selection is highlighted (see picture) and press "**MENU**" to confirm selection.

c) Press "AUTO" once to confirm preferred settings and exit to the OSD ROTATE sub-menu to begin the next adjustment or to completely exit out of the On Screen Display by pressing "AUTO" again.

OSD SETTINGS (Sub-Menu) - RESET

Picture	Color	Advar		OSD	Information
	Language Menu Time OSD H Position OSD V Position Transparency OSD Rotate Reset		English	60 100 100	
	ų	Ð	< >		144.0Hz

The RESET feature in the OSD SETTINGS sub-menu will allow you to reset all On Screen Display (OSD) configurations or changes you have made - back to the monitors default settings.

a) In the OSD SETTINGS sub-menu, use the "**DOWN**" or "**UP**" to navigate to RESET. Make sure selection is highlighted (see picture) and press "**MENU**" to RESET all changes made in the On Screen Display Menu (OSD).

AMD FreeSyncTM Technology

To enable FreeSync, you must first install a FreeSync compatible AMD Radeon Graphics Card and newest AMD Radeon Graphics Drivers in your computer. For more information regarding AMD FreeSyncTM technology, please visit:

http://www.amd.com/en-us/innovations/software-technologies/technologies-gaming/freesync

The NX-EDG27 and NX-EDG27S has FreeSync enabled by default. FreeSync can be turned OFF or ON using the newest Radeon Software Settings:

AMDZ RADEON SETTINGS				☆ _ □ ×	
Configure display settings to optimize your viewing e	kperience	more i Arrange Displays i Desktop Color 💿 Identify All 🖵 Enable Clone

YouTube Tutorial Video on "How to Enable AMD FreeSync with your Nixeus FreeSync Monitor:"

https://www.youtube.com/watch?v=74mwr4hzMDI

If you need additional assistance, please contact Nixeus toll free at 888-983-4128 or e-mail techsupport@nixeus.com

Nixeus Technology, Inc. ("Nixeus") provides this Limited Warranty:

• Only to the person or entity that originally purchased the product from Nixeus or its authorized reseller or distributor, and

• Only for products purchased and delivered within the United States, the District of Columbia, U.S. Possessions or Protectorates, U.S. Military Installations, or addresses with an APO or FPO, and Canada.

Three Year Limited Warranty for NX-EDG27 and NX-EDG27S:

Nixeus warrants this product will be free from material defects in workmanship and materials under normal use from the original date of purchase.

• Product (excluding power supplies): Three (3) years

- Power supplies: Three (3) years
- Spare parts and spare kits: Ninety (90) days

• Larger monitor panels may have some glow around the edges or corners. This is known as back light bleed and panel Glow - this is normal due to the LED technology that allows more light and higher brightness to produce more vibrant colors and brighter pictures.

• Having up to 3 Bright or 3 Dark Pixel anomalies is considered normal and the monitor is not defective.

Warranty serviced monitors and RMA replacement parts may still consist of these allowed pixel anomalies. Monitor is considered defective if it contains MORE than the above stated allowed pixel anomalies.

Under this Limited Warranty will be, at Nixeus's option, to either repair or replace the defective Product during the Warranty Period at no charge to the original owner excluding shipping and handling fees. The replacement product needs not to be new nor have identical make, model or part. Nixeus may replace the defective Product or any part thereof with any factory reconditioned product that Nixeus determines is equivalent in all material respects to the defective Product. Replacement or repaired Product will be warranted for the remainder of the original Warranty Period or ninety (90) days, whichever is longer.

Non-Applicability of Limited Warranty:

Limited Warranty of Nixeus's products will not be applied to and does not cover any refurbished/reconditioned product and any product purchased through clearance or liquidation sale or other sales in which Nixeus, the sellers, or the liquidators expressly disclaim their warranty obligation, whereas the product is being sold "As-Is" without any warranty.

RMA (Return Merchandise Authorization) Request:

The customer shall return the product with proof of purchase to Nixeus for RMA processing. In case the return policy period has expired from the retailer or distributors and the product is within warranty, the customer shall submit a RMA to Nixeus as described below:

• Customer (End User) must submit a RMA request with the product as part of the claim with a written detai description of the Product issue allowing Nixues to confirm the same, along with proof of purchase of the product (dated receipt).

• The customer must first contact technical support from Nixeus Technical Support at techsupport@nixeus.com, who will attempt to assist and remedy the customer in resolving their issues and concern with the product. If the product is considered defective or malfunctioning, the Customer (End User) must obtain a Return Material Authorization ("RMA") number by completing the RMA form and entering the assigned RMA Number assigned by techsupport@nixeus.com.

• After an RMA number is assigned, the defective/malfunctioning product must be packaged securely in the original or other suitable shipping package to ensure that it will not be damaged in transit to Nixeus Technology, Inc. The RMA number must be visibly and clearly marked on the outside of the package. Do not include any manuals or accessories in the shipping package, Nixeus will only replace/repair the defective/malfunctioning product and will not ship back any accessories.

• The Customer (End User) is responsible for all incoming shipping charges to Nixeus. RMA replacements need be fully insured by the customer expense and shipped to Nixeus Technology, Inc., 4801 Little John Street, Suite E, Baldwin Park, CA 91706. Nixeus will not be held responsible for lost packages shipped during transit to Nixeus's Office. Nixeus will ship back the repaired or replacement package any common carrier selected by Nixeus. Return shipping fees shall be paid by Nixeus, if a United States address is used, otherwise the product will be shipped to you using freight collect. Expedited shipment methods are available at Customers (End Users) expense upon request. We "Nixeus" reserve the right to deny and reject any returned products if

guidelines/instructions and request are not met, return shipment will be charged to the Customers "End Users" at their expense.

What Is Not Covered Under Limited Warranty:

The Limited Warranty provided by Nixeus does not cover the following:

Improper or incorrectly performed service maintenance or repairs voids this Limited Warranty. Products that Nixeus' judge to have been subjected to abuse, accident, alteration, modification, tampering, negligence, misuse, faulty installation, repair or service in any way that is not contemplated in the documentation for the product, or if the model or serial number has been altered, tampered with, defaced or removed, product failures due to power outages, and cosmetic damage, and does not limit damage that are caused by shipment, due to act of God. Any hardware, firmware or other products or services provided by anyone other than Nixeus.

Limitation of Liability:

NIXEUS IS NOT LIABLE UNDER ANY CONTRACT, NEGLIGENCE, STRICT LIABILITY OR OTHER LEGAL OR EQUITABLE THEORY FOR ANY LOSS OF USE OF THE PRODUCT, INCONVENIENCE OR DAMAGES OF ANY CHARACTER, WHETHER DIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL (INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF GOODWILL, LOSS OF REVENUE OR PROFIT, WORK STOPPAGE, **COMPUTER FAILURE OR MALFUNCTION. FAILURE OF OTHER EOUIPMENT OR** COMPUTER PROGRAMS TO WHICH NIXES'S PRODUCT IS CONNECTED WITH, LOSS OF INFORMATION OR DATA CONTAINED IN, STORED ON, OR INTEGRATED WITH ANY PRODUCT RETURNED TO NIXEUS FOR WARRANTY SERVICE) RESULTING FROM THE USE OF THE PRODUCT, RELATING TO WARRANTY SERVICE, OR ARISING OUT OF ANY BREACH OF THIS LIMITED WARRANTY, EVEN IF NIXEUS HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES TO THE MAXIMUM EXTENT PERMITTED BY LAW,, THE SOLE REMEDY FOR A BREACH OF THE FOREGOING LIMITED WARRANTY IS REPAIR, OR REPLACEMENT OF THE DEFECTIVE OR NONCONFORMING PRODUCT. THE MAXIMUM LIABILITY OF NIXEUS UNDER THIS WARRANTY IS LIMITED TO THE PURCHASE PRICE OF THE PRODUCT COVERED BY THE WARRANTY. THE FOREGOING EXPRESS WRITTEN WARRANTIES AND REMEDIES ARE EXCLUSIVE AND ARE IN LIEU OF ANY OTHER WARRANTIES OR REMEDIES, EXPRESS, IMPLIED OR STATUTORY.

Governing Law:

This Limited Warranty shall be governed by the laws of the State of California. Some states do not allow exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the foregoing limitations and exclusions may not apply. This Limited Warranty provides specific legal rights and you may also have other rights which vary from state to state.

Computer Hardware and Electronics Recycling:

Nixeus Technology, Inc is committed to a greener environment by encouraging all our Nixeus customers to recycle our covered electronic devices (CEDs) and accessories. It is illegal to throw away your electronic devices in regular garbage and landfills. Electronic devices need to be recycled or properly disposed of to avoid unnecessary harm to our community and environment. By donating, properly disposing and recycling your unwanted electronic products, we can work together to conserve our natural resources, reduce greenhouse gas emissions, and avoid air/water pollution.

For more information regarding electronics recycling and proper disposal of electronics, please visit: http://www.nixeus.com/recycle/
